2025 Beef Expo Hay Quality Contest

Below are the hay entries ranked by RFQ.

Context: RFQ, or relative forage quality, is based on total digestible nutrients and an estimate of dry matter intake. While it is not used to balance rations, it provides a reasonable first approximation as to whether or not a forage will provide a cost-effective base to the diet being fed to the selected animal class. The Southern Forage Quality categorization is as follows: Premium: >140, Good: 110-139, Fair: 90-109, and Utility <90. Young, growing steers and heifer calves benefit most from RFQ greater than 125 and yearling heifers benefit from RFG greater than 115.
