

## **Bristol Steer and Heifer Show Knoxville Spring Junior Cattle Exposition**

*The Bristol Steer and Heifer Show and the Knoxville Spring Junior Cattle Expo will be held concurrently and provide an opportunity for Tennessee and Virginia youth to participate in 2 separate shows during the same weekend. They will function as 2 separate shows with separate judges while sharing facility and date. Youth may compete in either or both.*

**Online Entry -** <https://bestofshoware.com/utk/livestock/login.asp>

1. The first step is to create a new account. Only one account is needed per family. Siblings and their animals can be entered with the same account.
2. Once you have created an account and are logged in, click on Add New Exhibitor. Complete the demographic information for the exhibitor. If you select Both Knoxville and Bristol Shows at the bottom, the system will default to checking all animals that you enter into both shows. You are able to change this for each animal. You will be able to enter some animals for both shows and some animals for one of the shows.
3. After completing information, click Create New Exhibitor. At the next screen, click Add New Livestock Exhibit. Follow this process by entering all commercial heifers, market steers and registered heifers.
4. If you have siblings to enter under same account, click on Add New Exhibitor on the left to follow the same process for the next youth.
5. Once all animals are entered, click Process Entries. This screen will show the number of animals that have been entered. Then click on Proceed to Payment. This provides a form that can be printed to show all animals entered. This form will also be emailed to you.
6. At this point, these animals are entered. Then click on the yellow Pay Now button at the top of the page.
7. This takes you to the online payment function through UTIA Marketplace.
  - <https://tiny.utk.edu/2026BeefShowPayment>
8. On the first screen, input the total number of animals that you have entered into the shows. If you have entered an animal in both shows, do not count it twice. Enter the total number of individual animals. You will be able to select the shows for each animal later in the process.
9. On the next screen, you will see entries for the number of animals that you entered. You will select the appropriate shows for each animal. This is where you would select both shows for animals entered into both shows or select the individual show for an individual animal. Knoxville fee is \$10 per animal and Bristol fee is \$20 per animal.
10. Next input the demographic information that is requested and click Continue. This will take you to a screen that will show the information that you entered and your total amount due. You can click Continue Shopping to pay for more youth and animals. After you are finished, click Checkout to enter credit card information to pay the fees.
